

Week 2 Client Meeting Minutes

KM5a

Date: 12 March 2025

Time: 1:15 PM - 2:15 pm

Location: Online Teams Meeting

Client/Supervisor: Kamal Mammadov

Attendees: Hermanto

Ze Kai Chong

Jiali Gu

Tiantian Wang

Haoyu Zhang

1. Summary of Previous Meeting

In the last client meeting, we were introduced to the plan for client meetings for the first two weeks. We learned basic quantum computing concepts through lectures and examples. We were instructed to continue learning quantum computing theories in the next client meeting.

2. Quantum Computing Theories

The supervisor continued teaching fundamental quantum computing concepts, further building on the topics from the previous meeting. The key areas discussed included:

- Entanglement and its applications in quantum communication.
- Quantum gates and how they can be utilized in computational logic.

3. Clarifications with the Supervisor

The team had several questions regarding project development and game implementation:

- **Preferred game engine or programming language?**
 - The supervisor confirmed that there is no specific preference. The team is free to choose what is most suitable and convenient.
- **Will we be given user stories?**
 - No, the team is responsible for creating all user stories.

4. Next Steps

- Further research on quantum computing is needed to ensure the game integrates accurate and engaging quantum mechanics.
- Begin brainstorming on core concepts of the game and preliminary task allocation.
- Decide on a game engine and programming language in the next group meet.

5. Next Client Meeting

Date: 19 Mar 2025

Time: 1:15 PM - 2:15 PM

Location: Online Teams Meeting
