

Week 2 Group Meeting Minutes

KM5a

Date: 14 March 2025

Time: 1:00 PM - 2:45 PM

Location: Room 332 Barr Smith Library

Secretary: Tiantian Wang

Attendees: Hermanto

Ze Kai Chong

Mohon Dash Tanu

Jiali Gu

Tiantian Wang

Haoyu Zhang

1. Quorum Announcement

It was announced that a quorum of the team was present, and the meeting was duly convened to discuss project updates and next steps.

2. Task Updates and Allocation

- It was agreed that by the end of the week, the following documents should be uploaded to GitHub:
 - Meeting minutes from today's session.
 - Meeting minutes from the supervisor meeting.
 - Individual timesheets.
- Preliminary task allocation:
 - GitHub project repository setup: Hermanto
 - Meeting minutes documentation: Tiantian Wang
 - Preliminary role allocation: Mohon could be responsible for researching and integrating quantum computing concepts into the game. Jiali can be responsible for art and UI design. The rest should be discussed further.

3. Game Concept Discussion

- The team brainstormed and discussed the basic game design and agreed to use *The Qubit Game* (<https://quantumai.google/education/thequbitgame>) as a reference.
- A playthrough of the reference game was conducted to analyze installed features, evaluate potential improvements, and brainstorm ways to enhance gameplay for a more engaging experience.
- Brainstorming session on the game's genre and core concept took place, outlining initial ideas for game mechanics and themes.

4. Research & Design Documentation

- The team agreed that a design document and a game demo should be prepared by the next supervisor meeting.
- Research into quantum computing concepts is ongoing and will be discussed further in the next group meeting.
- Key quantum mechanics principles to be integrated into the game include:
 - **Superposition**
 - **Entanglement**
 - **Quantum Gates (mirroring effects)**

5. Technical & Development Decisions

- **Game Engine:** The team decided to use *Unity* for game development.
- **Role Allocation:**
 - Team members with less experience in development will contribute to **QA testing**.
 - Further role refinement will take place as development progresses.
- **Resources:**
 - The team is considering using open-source assets from platforms like *itch.io* for pixel art and other game resources.

6. Next Steps & Action Items

- Complete individual timesheets and upload them to GitHub.
- Finalize the structure and content of the design document.
- Conduct further research into quantum computing mechanics relevant to the game.
- Continue refining the game concept and begin initial prototyping.
- Prepare for the upcoming supervisor meeting by reviewing progress and ongoing tasks.

7. Adjournment

The next meeting is scheduled for 21 Mar 2025 (offline meeting)

The meeting was adjourned at 2:45 PM.
