

Week 3 Client Meeting Minutes

KM5a

Date: 12 March 2025

Time: 1:15 PM - 2:15 pm

Location: Online Teams Meeting

Client/Supervisor: Kamal Mammadov

Attendees: Hermanto

Ze Kai Chong

Jiali Gu

Tian Tian Wang

Haoyu Zhang

Mohon Dash Tanu

1. Summary of Previous Meeting

In the last client meeting, we received continued instruction on fundamental quantum computing concepts. The supervisor taught us about entanglement, quantum communication, and quantum gates with their applications in computational logic. We also received clarification that we are free to choose our preferred game engine and programming language, and that our team is responsible for creating all user stories.

2. Progress Showcase

Unlike previous meetings focused on quantum computing lectures, this meeting shifted to project progress discussions and demonstrations:

Tower Defense Game Demo (Hermanto)

- Presented a partially completed tower defense game built with Unity
- Game features qubits as towers, enemy wave progression, and in-game currency
- Currency generation is implemented through one of the qubit towers
- The demo is still in development and not yet finalized

Alternative Game Concept (Mohan)

- Mohan: Proposed a puzzle adventure game concept where the player is a hero solving quantum computing puzzles to find keys and progress
- Ze Kai Chong: Proposed a similar puzzle concept but with mechanics more similar to Portal as a reference

Feedback: Professor expressed interest in the puzzle game as it has more quantum computing

mechanics potential than tower defense game

3. Team Member Roles

The team has established a collaborative structure with distributed responsibilities:

- **Hermanto:**
 - Core game systems and architecture development
 - Technical integration coordination
- **Ze Kai Chong:**
 - Programming support for core game systems
 - Gameplay mechanics implementation
- **Mohon Dash Tanu:**
 - Quantum computing specialist
 - Ensuring accuracy of quantum mechanics in gameplay
 - Advising on implementation of quantum concepts
- **Jiali Gu:**
 - UI/UX design
 - Creating sprites and visual assets
- **Tiantian Wang:**
 - Project timeline management
 - Programming
- **Haoyu Zhang:**
 - Lead quality assurance testing
 - Programming support

4. Collaborative Responsibilities

Project management tasks will be rotated among team members, including:

- Creating meeting minutes
- Organizing weekly check-ins
- Progress tracking

Quality assurance is a shared responsibility for all team members, with Haoyu Zhang coordinating testing efforts and maintaining testing protocols

5. Next Steps

- Continuing development of the tower defense prototype
- Strengthen the theoretical quantum computing elements within the game
- Prepare a more detailed explanation of how quantum computing mechanics are implemented
- Plan to share more comprehensive quantum computing mechanics in the next meeting

6. Next Client Meeting

Date: 26 Mar 2025

Time: 1:15 PM - 2:15 PM

Location: Online Teams Meeting
