

Week 3 Group Meeting 1 Minutes

KM5a

Date: 21 March 2025

Time: 1:00 PM - 2:45 PM

Location: Room 332 Barr Smith Library

Secretary: Tiantian Wang

Attendees: Hermanto

Ze Kai Chong

Mohon Dash Tanu

Jiali Gu

Tiantian Wang

Haoyu Zhang

1. Quorum Announcement

It was announced that a quorum of the team was present, and the meeting was duly convened to discuss project updates and next steps.

2. Game Concept and Genre Discussion

- The team revisited the discussion on game genre, as Mohon had reservations about the tower defense concept
- After deliberation, the team reaffirmed the decision to proceed with the tower defense genre due to:
 - Lower demands on visual design resources
 - More practical scope given available time and resources
 - Adventure games would require developing a large open map, which is unfeasible with limited art resources
 - Only one team member (Jiali) specializes in art/drawing, with Hermanto having some experience.
- The team discussed potential implementations of quantum computing concepts:
 - Superposition
 - Entanglement
 - Quantum Gates
- After thorough discussion, Mohon was convinced of the viability of implementing these concepts within the tower defense framework

3. Pitch Presentation Planning

- With the Week 4 pitch presentation deadline approaching, the team shifted focus to preparation
- Ze Kai Chong highlighted key points that need to be covered during the presentation
- Tiantian Wang divided the presentation into sections and assigned parts to each team member to ensure everyone participates (as participation affects individual marks)

4. Upcoming Plans

- Sunday Practice Session (Online Discord Meeting):
 - Team will meet to review presentation slides
 - Each member will practice delivering their assigned section
 - Feedback will be provided to ensure cohesiveness
- Monday Recording Session (Individual Time):
 - Plan to record individual presentation segments
 - Videos will be edited together into a cohesive presentation
 - The compiled video will be shown to the professor for feedback before finalizing the pitch

5. Next Steps

- Complete assigned presentation sections by Sunday
- Prepare speaking notes for individual parts
- Continue refining game concept with focus on quantum mechanics implementation
- Finalize presentation slides with cohesive design
- Prepare for recording session on Monday.

6. Adjournment

- The next meeting is scheduled for 28 Mar 2025 (offline meeting)
- The meeting was adjourned at 2:45 PM.
